

**ENGLISH**

Madelene van der Berg writes: "Years ago a friend of ours suffered serious injuries to his legs while in the army. The injuries have healed, but due to the type of work he currently does, he often bumps his legs, resulting in wounds. Being a diabetic, he struggles with the broken sores that won't heal. I gave him enough BITTER ALOE GEL sachets for a week. He applied BITTER ALOE GEL during the day, covered the wound, but left it open at night. Within just 5 days there was a remarkable improvement, as can be seen in the after photo. One thing is clear: BITTER ALOE GEL is good-bitter-best!"

**AFRIKAANS**

Madelene van der Berg skryf: "'n Vriend van ons het jare gelede baie ernstige beserings op sy bene opgedoen terwyl hy in die weermag was. Die beserings het genees, maar weens die tipe werk wat hy tans doen, stamp hy gereeld sy bene stukkend. Omdat hy 'n diabeet is, sukkel hy met die stukkende plekke wat nie wil genees nie. Ek het hom genoeg BITTER ALOE GEL-sachets gegee vir 'n week. Hy het BITTER ALOE GEL bedags aangewend en die sere bedek, maar saans oopgelos. Binne net 5 dae was daar 'n merkwaardige verbetering, soos gesien kan word op die foto. Een ding is duidelik: BITTER ALOE GEL is 'n bitter goeie geneesmiddel!"
